

# SWAYAM MOTGHARE

ASPIRING FULL STACK WEB DEVELOPER

Chandrapur MH | +91 7249801011 | smayammotghare99@gmail.com | linkedin.com/in/swayammotghare2005

## PROFESSIONAL SUMMARY

B. Tech (ECE) student with industrial exposure and a keen interest in full-stack web development. Proficient in HTML, CSS, and JavaScript, with experience developing browser-based web applications and hardware-integrated applications. Currently learning the MERN stack to develop applications while improving my core knowledge of web development, coding, and problem-solving skills.

## TECHNICAL SKILLS

**Programming & Web:** HTML5, CSS3, JavaScript

**Frontend:** Responsive Web Design, DOM Manipulation

**MERN Stack:** React.js, Node.js, Express.js, MongoDB (Learning)

**Tools:** Git, GitHub, Visual Studio Code

## EXPERIENCE

**Assistant**

Aug 2025 – Oct 2025

GDB Electricals

- Assisted with electrical component testing and data logging.
- Supported project documentation and workflow tracking.
- Worked with team members to maintain technical records and daily work reports.
- Gained practical exposure to industrial electrical operations and workplace coordination.

## INDUSTRIAL TRAINING

**Industrial Trainee**

21 July 2026 – 24 July 2026

Ordnance Factory Chanda (MIL)

- Attended classroom sessions on manufacturing processes and industrial engineering.
- Gained exposure to Unit – III, BPS, Mechanical Engineering (ME), and Electrical Engineering (EE) departments.
- Learned about production workflow, industrial safety practices and quality assurance.
- Observed coordination among various engineering departments in a defense manufacturing environment.

## Projects

### RFID – Based Token Generation System

**Technologies:** HTML, CSS, JavaScript, RFID Microcontroller

- Developed an RFID-based smart token generation system with a web-based interface.
- Integrated RFID hardware with the application for automated token generation and queue management.

### Wireless EV Charging System

**Technologies:** HTML, CSS, JavaScript, Microcontroller

- Developed a wireless EV charging system using inductive coupling, eliminating physical charging cable with a web-based interface.
- Implemented ESP32 based IoT monitoring and control for real-time charging status.

### Personal Portfolio Website

**Technologies:** HTML5, CSS3, JavaScript

- Building a responsive portfolio website to present projects, technical skills, and achievements.
- Continuously enhancing the website as new technologies and development skills are learned

## Education

### B. Tech – Electronics & Communication Engineering

Rajiv Gandhi College of Engineering, Chandrapur

**2023 – Present**

CGPA: 6.33 (up to 5<sup>th</sup> semester)

### Higher Secondary Certificate (HSC)

Bhavanji Bhai Chawan High School  
Science Stream | Maharashtra State Board

**2023**

50%

### Secondary School Certificate (SSC)

Bhavanji Bhai Chawan High School  
Maharashtra State Board

**2021**

75%
